

Cyber shield Academy established in partnership with protection group int'l (PGI) providing cyber security skills and safeguarding critical information technology infrastructure.

CSA offering hands-on training courses and specialized programs in cybersecurity, artificial intelligence (AI), encryption, and virtual reality (VR).

Cyber Training Courses

1

Cyber Security Awareness
(CSA)

2

Cyber Security Awareness
for Executives (CSA-EX)

3

Certificate in Information Security
Management Principles
(CISMP)

4

Threat Intelligence

5

Mobile Application
Penetration Testing

6

Ethical Hacking Associate

7

Penetration Testing
Practitioner

8

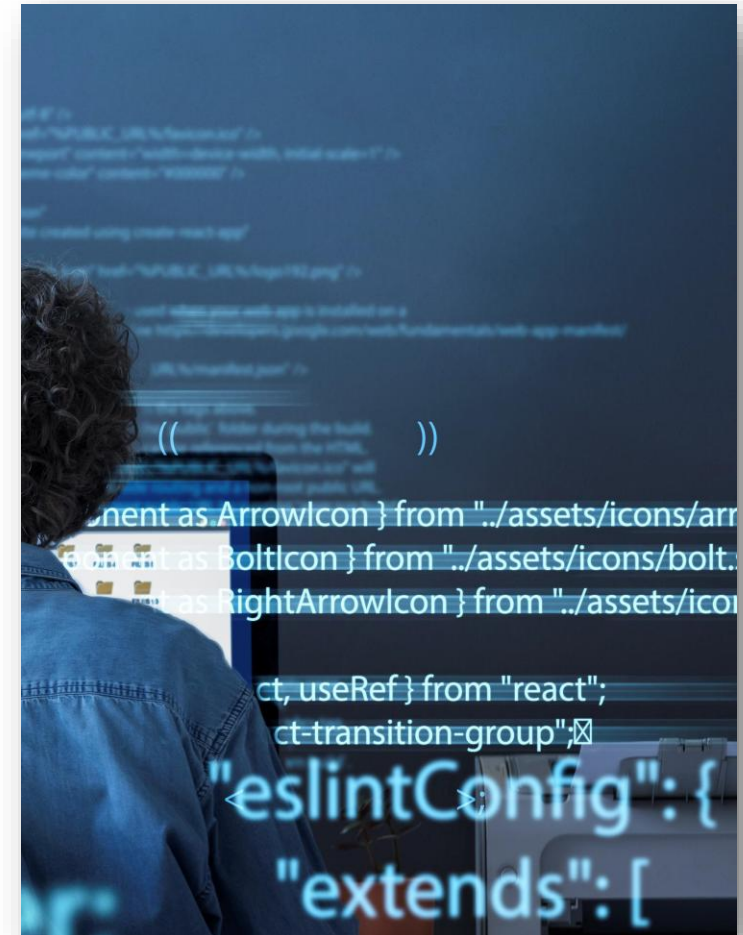

Digital Forensics and Incident
Response Associate

9

Digital Forensics and Incident
Response professional

10

API Penetration testing

Our Programs

1

Offensive Cybersecurity Program

5

Defensive Cybersecurity Program

2

Web vulnerability assessment

6

Network security

3

EncryptoSafe

7

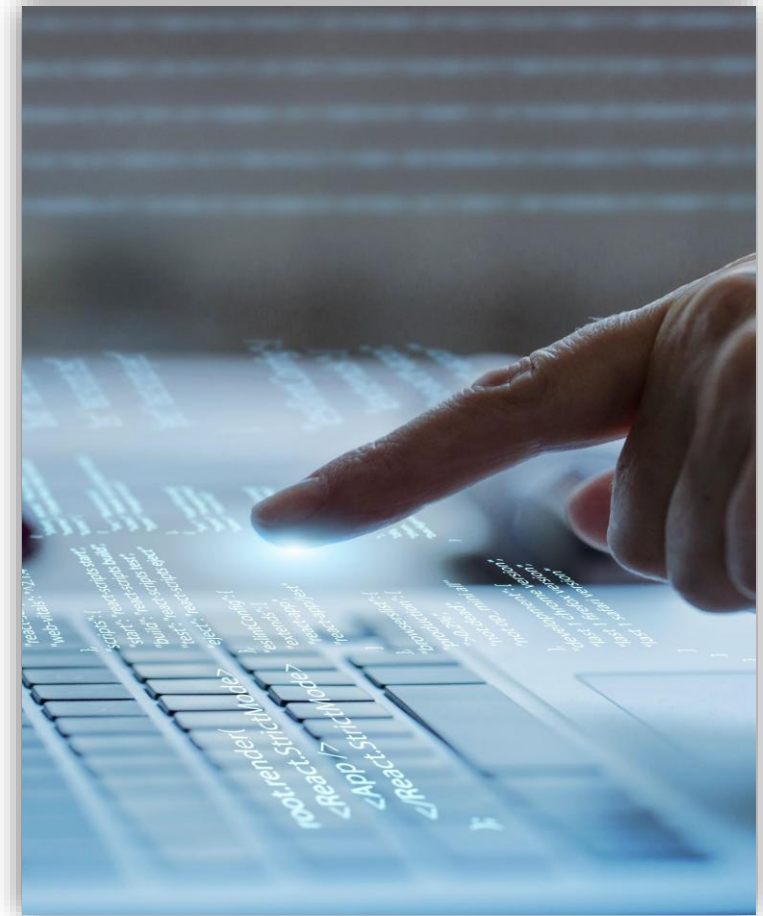

Prompt engineering

4

OSINT and Social media Data analytics

8

Customized Programs

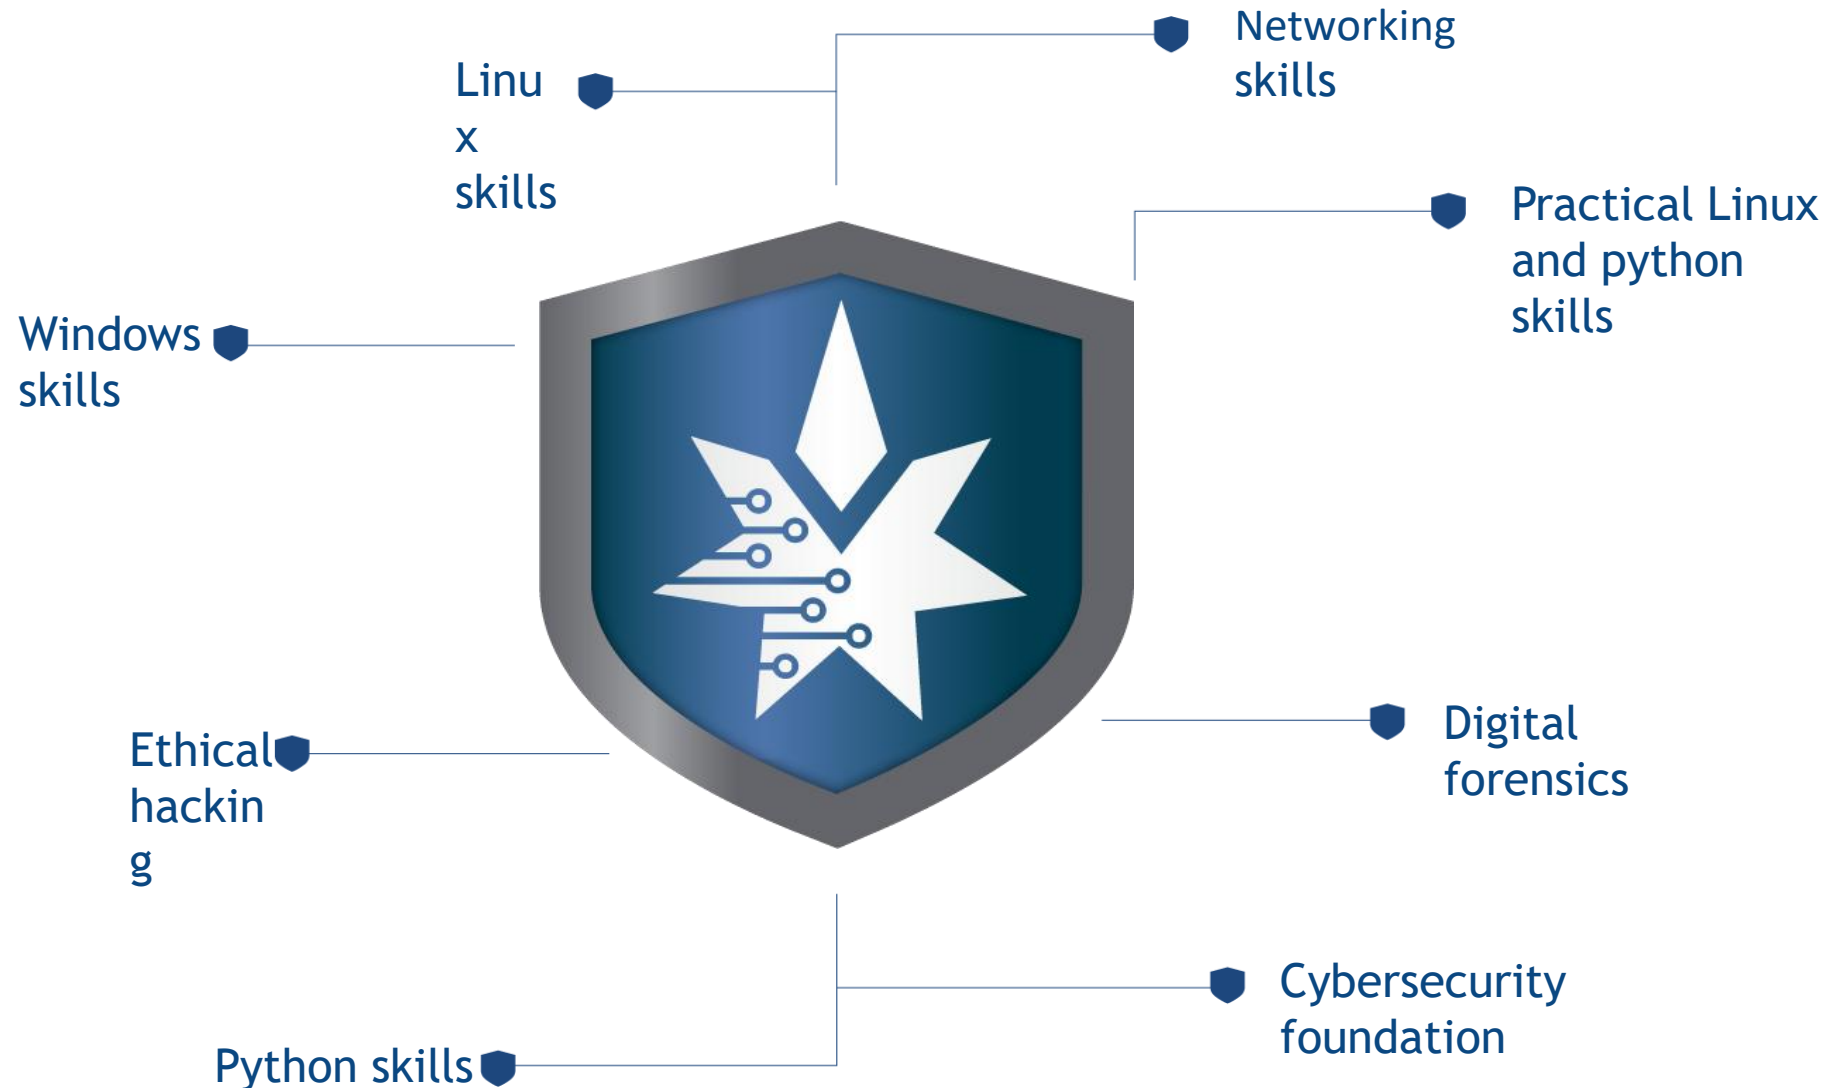

Future Technology Training Courses

- 1
AI Technical
- 2
Secure Coding
- 3
Augmented Reality and
Game Development
- 4
Advanced XR Development

Cybersecurity Upskilling Program

Diplomas

1

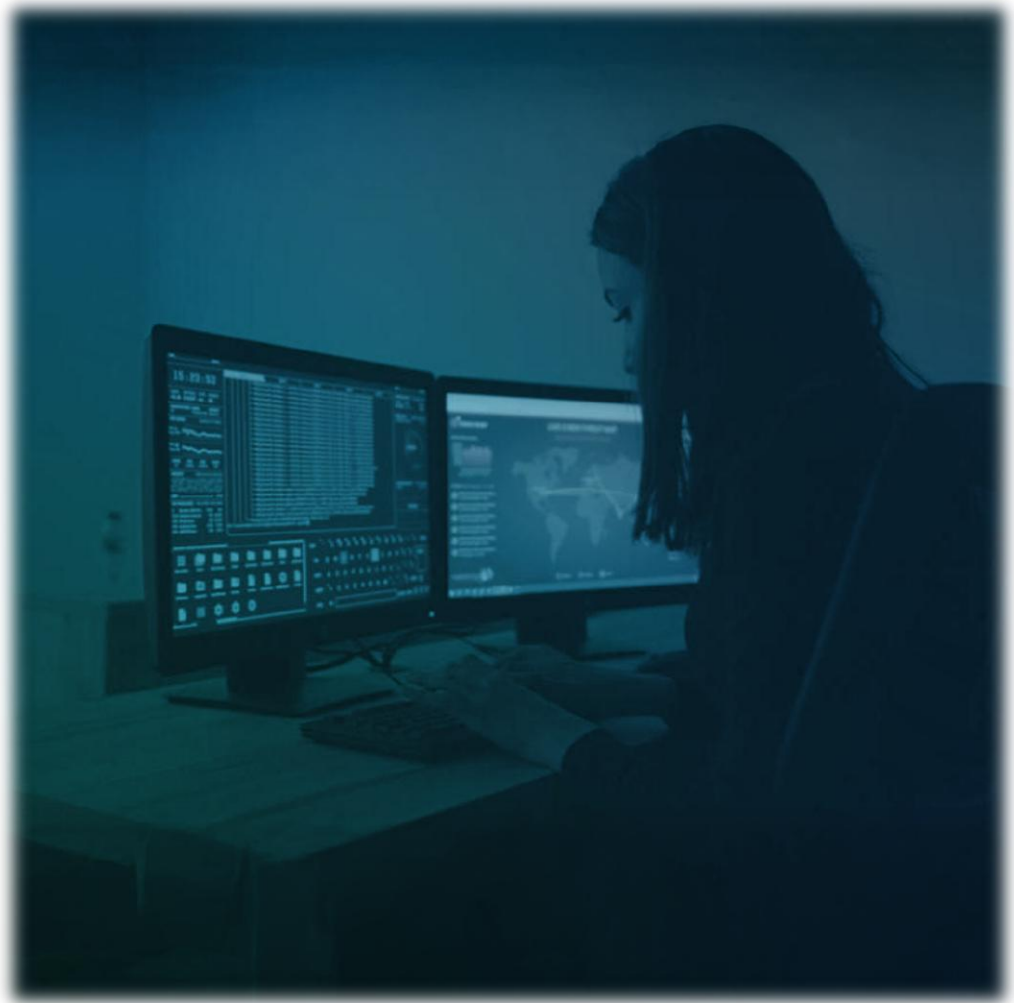

Cybersecurity Diploma in
collaboration with University of
Jordan

2

AI Diploma in collaboration
with University of Jordan

3

Cybersecurity in Law Diploma in
collaboration with Mutah
University

Trainers' selection

- Jordan Armed Forces officers
- PhD graduates from Jordanian universities
- experts from top local companies
- standout students with proven experience.
- Top Ethical Hackers In Jordan

Trainers Accreditation

- Evaluation by a CyberShield committee
- Completion of the designated course
- Participation as an assistant in two courses.
- Successful completion of the course examination

Training Methodology

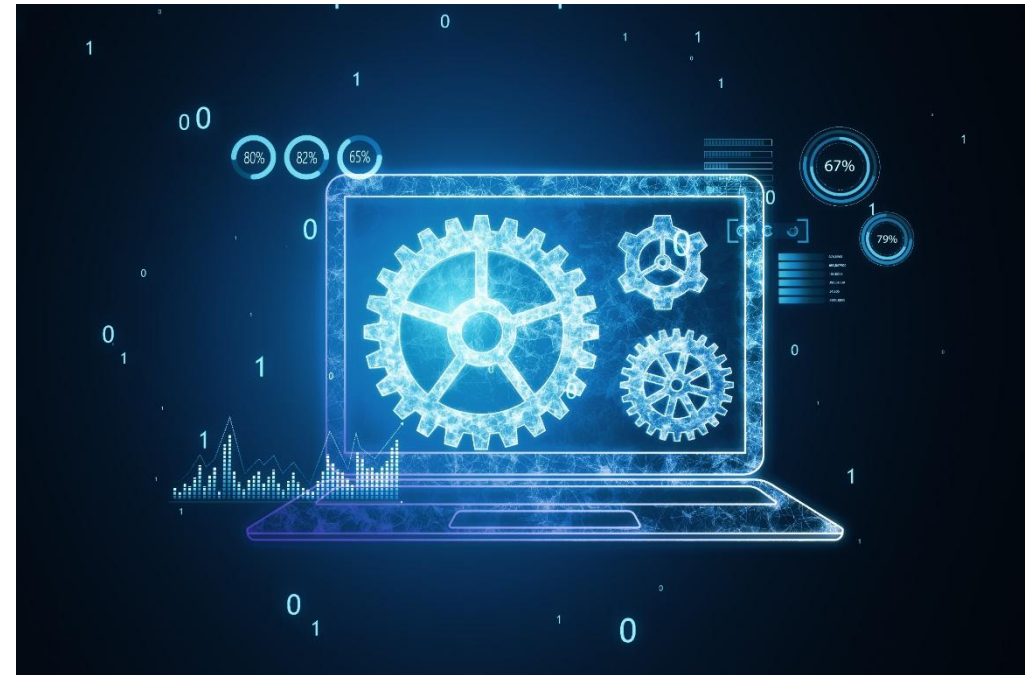

Infrastructure and Resources

Cyber Rig Lab

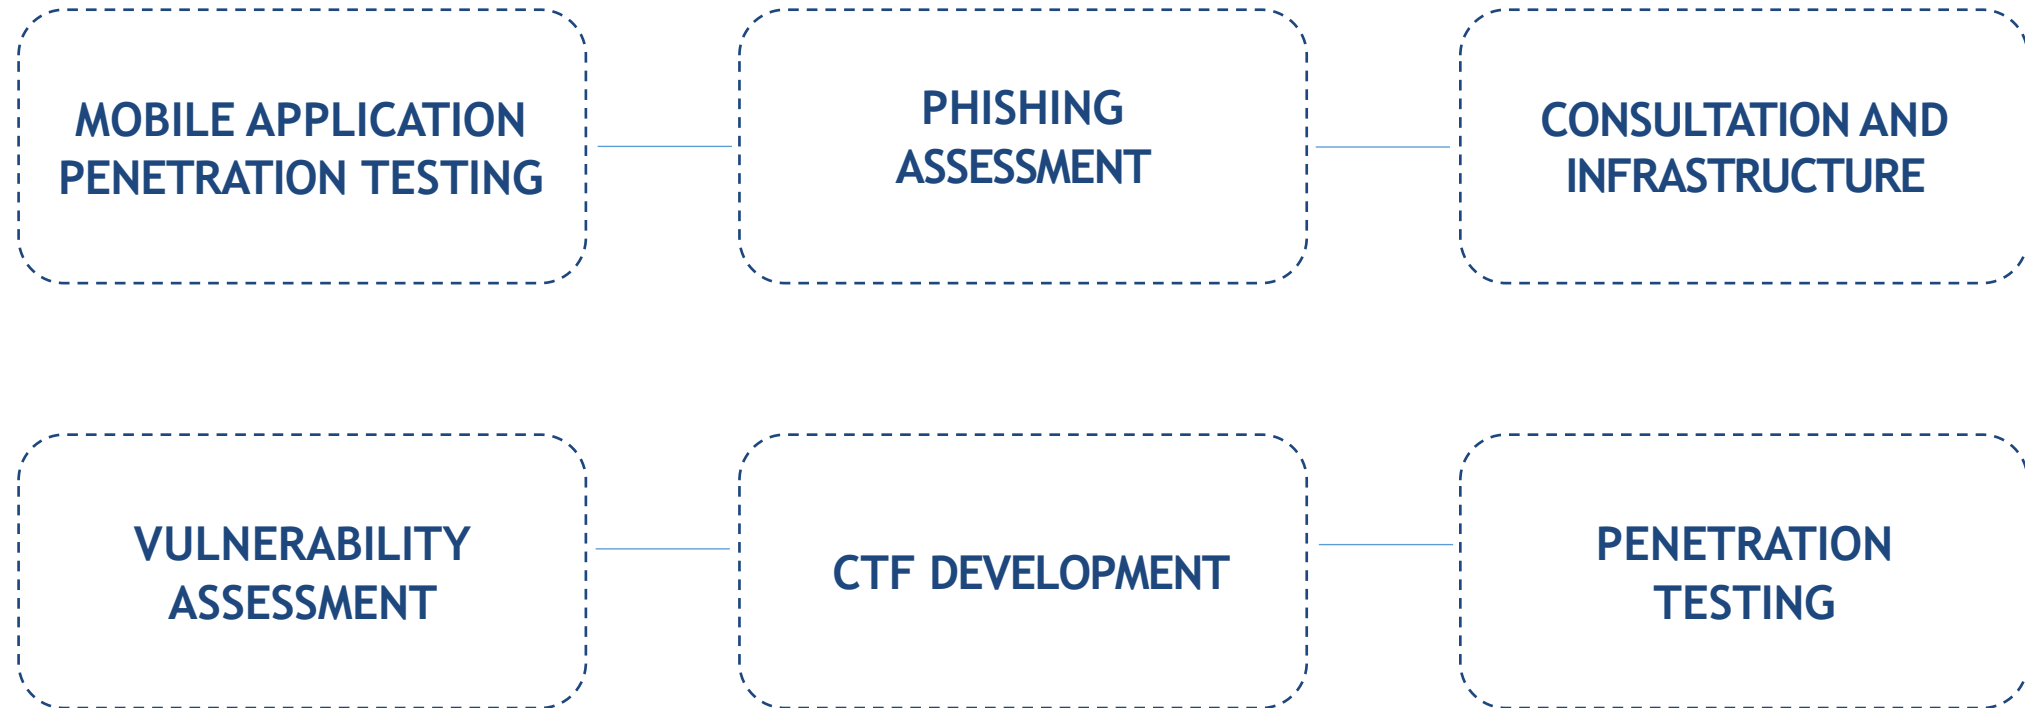

This lab offers a specialized training environment for trainees to practice within their virtual environment during the course.

Cyber Range Simulator Lab

The Cyber Range Simulator provides real-life scenario exercises, enabling trainees to test various security methods against different scenarios and applications. It simulates a network equipped with essential tools, such as SIEM and Firewall, for investigations, repairing damage from attacks, and other tasks.

Our services

Armython is the 1st specialized cybersecurity and Encryption competition designed for armed forces and security agencies in the world.

» **16**
countries

» **7**
International
Juries

» **320**
challenges

» **32**
teams

» **1000 +**
Attendees

Our services for universities

1

Empowering academic staff by providing Train the Trainer (TOT) courses in cybersecurity.

2

Developing **Capture the Flag (CTF) competitions** for students

3

Establishing and enhancing specialized cybersecurity labs focusing on ethical hacking, digital forensics, & vulnerability assessment.

4

Enhancing the **cybersecurity curriculum** in alignment with **university standards**, integrating it with practical labs.
